Operations & Delivery: ITSM, incident leadership, MSP/MSSP governance, SLAs, vendor management, change management, adoption, service improvement

WORK EXPERIENCE

IT Consultant | SafewayTax, Irvine, CA

May 2025 - Aug 2026

Hands-on technology modernization, cybersecurity, cloud operations, service delivery, and adoption leadership for a 75+ user professional services organization.

- Improved operational efficiency by 30% and workforce productivity by 20% by standardizing technology workflows, support routines, and user enablement.
- Migrated 85 people from Google Workspace to Microsoft 365 by directing planning, identity and data transition, testing, communications, training, and adoption.
- Sustained 99.9% infrastructure uptime and reduced downtime by 25% by strengthening operational controls, service ownership, vendor coordination, and escalation.
- Reduced security risk by 40% by improving identity, endpoint, access, monitoring, and prioritized remediation practices.
- Accelerated onboarding by 50% and reduced repeat support tickets by 45% by standardizing provisioning, documentation, self-service guidance, and root-cause resolution.
- Aligned modernization priorities to business needs by balancing security, reliability, usability, adoption, and small-organization capacity.

WORK EXPERIENCE, CONTINUED

VP of IT, Promoted from Senior Director of IT | Repipe Specialists, Burbank, CA

Jun 2022 - Sep 2024

Sole internal IT leader with enterprise accountability who built the operating model, then selected and governed an MSP as company headcount grew from 50+ to 100+.

- Supported 30% year-over-year business growth by translating business priorities into a scalable technology operating model, governance routines, and expanded service capacity.
- Reduced system downtime by 30% by strengthening infrastructure operations, service ownership, vendor accountability, and platform management practices.
- Lowered vulnerability exposure by 40% by formalizing cybersecurity controls, remediation discipline, identity and endpoint practices, and risk ownership.
- Cut incident resolution time by 35% by designing an MSP operating model with service expectations, escalation paths, performance reviews, and corrective actions.
- Improved executive decision speed by 25% by strengthening operational reporting, technology visibility, and leadership decision support.
- Improved workflow efficiency by 20% by leading NetSuite as business owner, directing third-party integrations, and administering the environment.
- Established portfolio and vendor governance by clarifying priorities, ownership, risks, dependencies, delivery expectations, and executive visibility.

IT End User Computing Leadership Assignment | AVEVA, Lake Forest, CA

Feb 2022 - May 2022

Global end-user computing coordination in a distributed enterprise software environment.

- Supported approximately 2,800 employees and endpoints by coordinating a 10-person global end-user computing team without formal management authority.
- Maintained cross-region service alignment by clarifying ownership, coordinating priorities and handoffs, and reinforcing consistent endpoint and support practices.

Site IT Operations Leadership Assignment | Cherokee Federal, Pomona, CA

Aug 2021 - Dec 2021

Mission-critical 24/7 technology operations with direct people leadership across three shifts.

- Sustained around-the-clock service coverage by leading seven direct reports across three shifts and strengthening ownership, handoffs, and escalation.
- Supported 2,400 employees and computers, approximately 1,000 mobile devices, and 650 additional tablets through disciplined endpoint and service operations.

Independent IT Consultant / Project Manager | PTS, Huntington Beach, CA

Aug 2019 - Jul 2021

One-person consulting and project-delivery practice serving small and midsize businesses.

- Delivered practical infrastructure, business systems, security, and modernization initiatives by aligning each engagement to client priorities, risk, and operating capacity.
- Maintained end-to-end accountability by coordinating discovery, requirements, vendors, implementation, change, and stakeholder communication.

IT Director / Program Manager | Master Engineering Services, Doha, Qatar

Nov 2017 - Jun 2019

Technology leadership for an engineering organization of approximately 250 employees.

- Improved delivery ownership by leading seven internal staff plus vendors across service delivery, infrastructure, business systems, and partner coordination.
- Strengthened operating consistency by aligning internal resources, external partners, technology priorities, and service expectations with business needs.

IT Operations Manager / Group IT Leader | Jaidah Group, Doha, Qatar

Mar 2006 - Oct 2017

Enterprise technology leadership for 1,250 employees across 17 subsidiaries through direct and indirect reporting lines.

- Expanded technology capacity by growing the IT team from 9 to 17 while supporting 1,250 employees across a diversified 17-subsidary group.
- Led an approximately \$2M SAP S/4HANA program across 15 non-automotive subsidiaries and 650 employees by directing business alignment, partner delivery, process standardization, and adoption.
- Standardized automotive operations and reporting by delivering separate Incadea implementations for two automotive subsidiaries serving approximately 600 employees.
- Achieved 99.99% service availability by building and migrating a resilient multi-tenant data center and establishing operational ownership before cutover.
- Governed infrastructure, enterprise applications, service delivery, vendors, continuity, and business alignment across a complex multi-entity environment.

KEY PROJECTS & ACHIEVEMENTS

- **Scalable IT Operating Model:** Supported 30% year-over-year growth at Repipe Specialists by establishing governance, service ownership, cybersecurity discipline, vendor accountability, and a governed MSP model.
- **Business-Owned NetSuite Transformation:** Improved workflow efficiency by 20% by leading the implementation as business owner, personally directing third-party integrations, and administering the production environment.
- **Microsoft 365 Modernization:** Migrated 85 people from Google Workspace to Microsoft 365 while improving productivity by 20%, accelerating onboarding by 50%, and reducing repeat support tickets by 45%.
- **SAP S/4HANA and Incadea Portfolio:** Led an approximately \$2M SAP program across 15 non-automotive subsidiaries and 650 employees, plus separate Incadea implementations for two automotive subsidiaries.
- **Multi-Tenant Data Center Build and Migration:** Achieved 99.99% service availability by governing design, migration, validation, operational readiness, and partner coordination across a 17-subsidiary group.
- **End-User Operations at Scale:** Coordinated service for approximately 2,800 employees and endpoints at AVEVA, and led seven direct reports supporting a large 24/7 device estate at Cherokee Federal.
